

NVQ level 7 – Construction Senior Management

This course is designed for training and personal development of individuals aspiring to a career in senior management in their specialist sector.

The objective of this qualification is to provide candidates with the knowledge and expertise, demonstrate workplace compliance and competence in team management.

The course provides an understanding of legislation, training, HSE compliance and current operational management criteria within the construction industry.

Candidates are assessed against a set of performance criteria and knowledge derived from “National Operational Standards” and will be assessed by a qualified Industry Assessor.

This qualification is recognised by The Chartered Institute of Building (CIOB) as an accredited qualification.
